<group>
<names variable="container-author reviewed-author">
<label form="verb-short" text-case="lowercase" suffix=" "/> 👈
<name and="text" delimiter=", "/>
</names>
</group>
```

CSL parle anglais : l'attribut `suffixe` *n'existe pas ; le vocabulaire correct est* `suffix`

Erreur 6

```
<choose>
<!-- Published Conference Paper >
<if variable="container-title">
<group delimiter=", ">
<group delimiter=" ">
<text term="in"/>
<text variable="container-title" font-style="italic"/>
</group>

Erreur 7

```
<macro name="url">
<choose>
<if variable="URL">
<text variable="URL" prefix="<" suffix=">"/>
<group delimiter=", ">
<text term="accessed" suffix=" le "/>
<date variable="accessed" form="text" date-parts="year-month-day"/>
</group>
</if>
</choose>
...
</macro>
```

Erreur 7 - corrigé

```xml
<macro name="url">
<choose>
<if variable="URL">
<text variable="URL" prefix="&lt;" suffix="&gt;"/>  👈
<group delimiter=", ">
<text term="accessed" suffix=" le "/>
<date variable="accessed" form="text" date-parts="year-month-day"/>
</group>
</if>
</choose>
...
</macro>
```

Les chevrons sont signifiants en XML et doivent être échappés par `<` *pour le chevron ouvrant et* `>` *pour le chevron fermant*
